

SCBP'15

WORKSHOP ON SECURITY AND COMPLIANCE IN BUSINESS PROCESSES

Co-located with the 14th Int'l Conf. on Perspectives in Business Informatics Research, Tartu, Estonia

(BIR 2015)

PROGRAM COMMITTEE CHAIRS

Naved Ahmed

University of Tartu, Estonia

Raimundas Matulevičius

University of Tartu, Estonia

PROGRAM COMMITTEE

Achim D. Brucker, Germany
Isabelle Comyn-Wattiau, France
Eduardo Fernández, US
Khaled Gaaloul, Luxembourg
Anat Goldat, Germany
Jan Jürjens, Germany
Seok-Won Lee, Korea
Lin Liu, China
Per H. Meland, Norway
Haralambos Mouratidis, UK
Andreas Opdahl, Norway
Guenther Pernul, Germany
Stefanie Rinderle-Ma, Austria
David G. Rosado, Spain
Guttorm Sindre, Norway
Nicola Zannone, the Netherlands

IMPORTANT DATES:

Paper Submission:

May 25, 2015

Notification:

June 29, 2015

Camera Ready:

July 20, 2015

Workshop Date:

August 26, 2015

Goal

Despite the growing demand for business processes that comply with security policies, security and privacy incidents caused by erroneous workflow specifications are regrettably common. This is, in part, because business process management and security are seldom addressed together, thereby hindering the development of trustworthy and security-compliant business processes. The Workshop on Security and Compliance in Business Processes (SCBP'15) seeks to bring together researchers and practitioners interested in the management and modelling of secure and compliant business processes in process-aware information systems. In particular, SCBP'15 encourages innovative methods for workflow security modelling, security compliance, audit and control throughout the business process lifecycle: from design time verification to online operational support and post-mortem analysis. Furthermore, it welcomes contributions beyond the strictly technical, such as those considering social, economic, legal and standardisation issues.

The goal of SCBP'15 is to obtain a deeper understanding of a rapidly maturing, yet still largely under-investigated field of business process security, audit and control, including both thorough security requirements formalisation, secure process modelling, and mechanisms for verification, monitoring and auditing. Besides the "technical" intent to substantially advance the current state of the art, SCBP'15 aims to locate active research areas in academia and industry; get a snapshot of the current approaches and existing tool-support; encourage approaches and techniques that combine formal foundations with industrial applicability; and identify new research directions and challenges. In tackling these questions we hope to make a substantial contribution to reliable and secure business process management.

Topic of Interest:

- Alignment
- Authorization
- Accountability
- Audit reduction
- Business provenance
- Case studies
- Conformance/compliance checking
- Continuous audit
- Cost-benefit analysis
- Data-centric process mining
- Economics of audit
- Experience reports
- Formal reasoning
- Fraud detection
- Information flow control
- Meta-models for analysis
- Operational decision support
- Privacy-aware process discovery
- Requirements elicitation
- Requirements formalisation
- Risk Measurement
- Runtime verification and monitoring
- Security modelling
- Security testing
- Trace clustering
- Usage control
- Workflow forensics
- Workflow simulation

Submitted manuscripts must be written in English and papers can be submitted in two categories:

- 1) full papers (no longer than 12 pages), and
- 2) research in progress & experience report (no longer than 6 pages).

They must be formatted using the Springer **LNBIP format** format and submitted as a PDF document to the <https://easychair.org/conferences/?conf=scbp15>. Submissions will be reviewed on the basis of their originality, significance, technical soundness and clarity of exposition. Each submission will be reviewed by at least three PC members. Submitted manuscripts must not substantially overlap manuscripts that have been published or submitted to another peer-reviewed conference or journal.

Accepted workshop papers will be published in the **CEUR proceedings**. Authors of the best papers will be invited to submit the extended papers to a special issue of the **journal on Complex Systems Informatics and Modeling Quarterly (CSIMQ)**.
